i-PARCEL™
Parcel Management Lockers
An Innovative Solution for Secure Parcel Delivery and Collection

Intelligent and secure electronic locker systems for parcel delivery and collection. Enable your multi-family housing residents to collect parcels, with 24/7 access from any delivery source. The i-PARCEL™ smart locker is a modular and expandable solution developed especially for parcel collection. The system is maintenance free and functionality can be managed locally. Security of data is of primary concern and the system is fully compliant with all data protection standards. No resident data is stored locally thanks to the enterprise-level cloud based control system.

With the rise of e-commerce, there is an increasing need to manage Online purchase deliveries effectively. Nowhere is this more apparent than within apartment complexes nationwide. During peak holiday times, parcel and package deliveries can easily increase by a factor of five. As a multi-family housing unit owner or operator, this places an increasing demand on your staff to manage these packages until the time of collection. In addition to the time and effort it takes to manage this process, you are also taking responsibility for the package security.

The American Locker i-PARCEL™ is available outside your leasing office hours, enabling residents the freedom to collect at their convenience, 24/7. The i-PARCEL™ improves your residents’ satisfaction and will also resolve their concerns around failed or lost deliveries.

**i-PARCEL™ Electronic Parcel Lockers**

**Apartment owners** reduce management time handling packages, improve security and improve resident satisfaction.

**Residents** benefit from increased security, no missed deliveries, and 24/7 convenience to access those deliveries.

**Courier companies** significantly reduce the last mile delivery costs, with first time delivery and consolidated drop off location.
**Considerations**

Typical problems delivering packages to apartment complexes

- Typically, there is no dedicated area to store packages for what can be long periods of time
- Security of individual packages cannot be guaranteed
- Wastes significant management resources that are better applied elsewhere
- Residents have to hunt around to locate packages
- Residents can only collect packages during office hours
- In complexes where packages are left on the doorstep, theft can be a major problem
- During the holidays and peak ordering periods, space to accommodate parcels can be an issue
- Residents can only collect packages during office hours
- In complexes where packages are left on the doorstep, theft can be a major problem
- During the holidays and peak ordering periods, space to accommodate parcels can be an issue

**i-PARCEL™ Solution**

- Secure electronic parcel locker system designed for multi-family housing complexes

Over 85 years ago, American Locker invented the rental locker business in the U.S. with our iconic orange key cap lockers. Today, we continue the tradition of providing innovative custom storage solutions to protect and secure valuables for organizations of all sizes.

**Ten things to consider when choosing a locker provider**

1. Comprehensive product portfolio to support all your current and future applications
2. In-house, custom-designed solutions
3. Third-party accredited product quality guarantee, i.e. ISO 9001:2008
4. Accessibility of dedicated product specialists
5. Real-time access to project status updates
6. Domestic, state-of-the-art manufacturing facilities
7. Long-term blue chip customer base
8. Ongoing investment in R&D and new product development
9. Track record of continuous innovation and seamless system integration
10. Size, stability and credibility of provider

**Your value proposition with American Locker**

When you partner with American Locker and take advantage of our complete menu of value-added services, you will be making a smart investment in your company while providing your stakeholders with something even more valuable -- peace of mind.
